

BA777 Gooseneck Heavy-Duty Playground Pole

Pole shall be constructed of 4 ½” outside diameter RS40 zinc flow coated steel tubing with a 7 ga. wall thickness. Design shall be a bent gooseneck style and allow for a 48” bury into the ground and a 48” extension from the front of the pole to the face of the backboard. Two 1 5/8” diameter 13 ga. zinc flow coated tubular braces shall support the top of the backboard and connect directly to the pole. Pole shall be designed so that the rim mounts directly to the horizontal pole section through the backboard to eliminate stress on the backboard during play. Pole systems without backboard support braces shall not be considered equal. Poles shall carry a minimum 25-year warranty and shall weigh 150#.
